FPi 5700 | Elite Series
Large application inserter

Time saving and cost effective	Simple and easy to operate	Fold, insert and seal envelopes	Intelligent operation	High Volume inserter

Perfect for a busy mailroom, the FPi 5700 is quick, versatile and easy to use. The modular design offers custom-tailored inserting solutions for medium and large quantities of mail. The intelligent technology reads the whole page, allowing flexible use of OMR.

Duplicate or faulty documents are diverted whilst the machine continues to run, allowing for efficient processing. The vertical stacker requires less regular unloading, allowing users to carry out other tasks throughout.

FLEXIBLE CONFIGURATION

Documents can be fed from up to six stations, available in various configurations. Automatic and special stations, a high-capacity feeder, short feeder tray and maxi-feeder are also available.
The high capacity vertical stacker holds 500 envelopes, ergonomically designed for easy handling.

SIMPLE OPERATION

Everybody can use the FPi 5700. The 7-inch glass display and intuitive operation guide and support the user with easy-to-understand directions. With self-explanatory graphics-oriented menu options and an 'on-board' operating manual.
The FPi 5700 will automatically adjust and save settings to its memory, which can be recalled instantly.

Specification

Document feed width | 130mm x 230mm

Document feeder height | 90mm x 356mm

Paper weight | 60gsm to 250gsm

Pre-fold enclosures | H 90mm - 162mm W 160mm - 248mm

Folding capabilities | up to 10 sheets (80gsm)

Maximum insert thickness | 2.5mm

Feeder capacity | 725 sheets (80gsm)

Envelopes | C6, DL, C5

Envelope feeder capacity | 325

Insertion speed | 4,000 per hour

Programmable memory | 20 jobs

Dimensions | 1820mm(L) 925mm(H) 420mm(D)

FPi 6700 | Elite Series
## Intelligent, high volume, versatile

Time saving and cost effective

Simple and easy to operate

Fold, insert and seal envelopes

Intelligent operation

High Volume inserter

The FPi 6700 is the most powerful in the range and can process large volumes of mail; up to 4,300 pieces every hour. Allowing up to 7 feeding stations and a vertical power stacker as standard, the FPi 6700 can deliver exceptional results for your large mailing requirements. The intelligent scanning device can read coding on the mailings ensuring 100% accuracy in processing.

FLEXIBLE CONFIGURATION

The FPi 6700 is completely flexible allowing 2-7 stations. The (optional) versa-feeder allows brochures to be fed through, adding material to letter contents without folding it prior to inserting. In its maximum configuration, with 2 Maxi-feeders and high-volume document feeder, it can process more than 3,000 sheets of paper.

SIMPLE OPERATION

The FPi 6700 has a 10-inch glass display. Its self-explanatory graphics-oriented menu options and an 'on-board' operating manual allows for intuituve operation, even for occasional users.
